

Asraf Jamal

Summary

Experienced and passionate **Full-Stack Developer** with 5 years of hands-on expertise in building high-quality web applications. Deep proficiency in frontend technologies, specializing in **React JS**, **Redux**, **TypeScript**, and **Next JS**. Skilled in **API integration**, version control with **Git/Github**, and adept at creating responsive UIs using HTML, CSS, and Tailwind

Technical Skills

- | | | |
|--------------|-------------------|------------|
| → React JS | → HTML | → Node JS |
| → Redux | → CSS | → Mongo DB |
| → TypeScript | → Tailwind | |
| → Next JS | → API integration | |
| → Javascript | → Github | |

Professional Experience

Kellton

Senior Software Engineer (2022 - present)

Key responsibilities include:

- **Developing and maintaining dynamic, responsive user interfaces** using React.js for web applications.
- **Collaborating with cross-functional teams** including backend developers, UX/UI designers, and product managers to create seamless and high-performance applications.
- **Optimizing application performance** through code splitting, lazy loading, and other best practices.
- **Managing application state** using Redux, Context API, or similar state management tools.
- **Building reusable, modular, and scalable components** using React functional components and hooks.
- **Integrating RESTful APIs and third-party services** to fetch data and handle asynchronous requests.

- **Following Agile methodologies** to meet project timelines and deliverables, participating in sprint planning, and daily stand-ups.
- **Optimizing and refactoring legacy code** for improved performance, maintainability, and scalability.

Capital Technology

Web Developer (2019 - 2022)

Key responsibilities include:

- Developed and maintained responsive HTML pages for eCommerce Learning Management System (LMS) websites using HTML5, CSS3, and JavaScript.
- Collaborated with design teams to implement pixel-perfect and user-friendly designs, ensuring visual consistency across browsers and devices.
- Created and optimized static web pages that adhered to SEO best practices, ensuring faster load times and improved user engagement.

Professional Projects

LPL Web App :

Technologies: React JS, Redux, Material UI

Project Description:

The LPL Web App is a loan offering platform that offers to old users to apply for loans by following a guided journey. Users can log in with OTP verification and complete steps like selecting the loan amount, updating bank details, providing address information, and completing KYC verification. Based on the application process, the loan can either be approved or rejected.

Key Features:

- **OTP-based Login:** Secure user authentication via OTP for seamless access to the loan application process.
- **Responsive User Interface:** Developed with Material UI to ensure a clean, modern, and responsive user interface, making it easy to navigate on both desktop and mobile devices.
- **State Management with Redux:** Efficiently managed global state throughout the application using Redux for consistent and scalable state management.
- **Error Handling & Notifications:** Provided real-time feedback to users via notifications, ensuring a smooth journey by highlighting errors and successful actions.

Role & Responsibilities:

- Developed the front-end UI using **React JS** and **Material UI** to create a user-friendly interface.
- Implemented **Redux** for state management across the application to ensure data consistency and performance.
- Handled application validation and error management to guide users throughout the application journey.
- Integrated OTP-based login functionality and other authentication mechanisms.

LPL Dashboard:

Technologies: React JS, Redux, Tailwind

Project Description:

The LPL Dashboard serves as an administrative interface for monitoring and managing the loan application journey within the LPL Web App. The dashboard provides real-time insights into the status of user applications, logs of application activities, and detailed tracking of the application's progress. It also captures errors, success events, and API responses to ensure a transparent and efficient workflow for administrators.

Key Features:

- **Application Monitoring:** Displays the number of loan applications in various stages of the journey, helping admins track progress in real-time.
- **Application Logs:** Detailed logs for each application, including timestamps, user actions, and status updates at each stage of the loan application process.
- **Error and Success Tracking:** Captures and displays logs for both successful actions and errors, enabling administrators to easily identify and resolve issues during the application process.
- **API Response Monitoring:** Tracks and logs API responses, including payloads, during the loan application journey, providing insights into the backend processes.
- **Responsive UI:** Built with **Tailwind CSS** to ensure a clean, responsive, and highly customizable UI, enabling efficient navigation and use across devices.
- **Data Filtering and Sorting:** Allows users to filter and sort loan applications by status, date, and other criteria for quick access to relevant information.

Role & Responsibilities:

- Developed the front-end of the **LPL Dashboard** using **React JS** and **Tailwind CSS** for building a responsive and efficient UI.
- Implemented **Redux** for centralized state management to handle the real-time data updates and API responses.

Credit Health Report :

Technologies: React JS, Tailwind CSS

Project Description:

The **Credit Health Report** enables existing users of the organization to securely log in to their loan accounts using their loan account number and OTP. Once logged in, users can access and download their personal credit health report after making a payment.

Key Features:

- **Credit Health Report Generation:** After successful login, users can view a preview of their credit health report, which provides insights into their credit score, loan history, and other financial details.
- **Responsive Design:** Built with **Tailwind CSS** to ensure a clean, responsive UI, providing an optimal user experience across all devices.

Role & Responsibilities:

- Developed the front-end user interface using **React JS** and **Tailwind CSS**, ensuring a smooth and responsive experience for users accessing their credit health report.
- Implemented secure user authentication with loan account number and OTP for login to ensure safety and privacy.
- Utilized **Tailwind CSS** for rapid styling and customization, creating a visually clean and consistent user interface.

Education

Creative Mind Institute of Technology Delhi

Certificate in Web Development : (2018).

Jamia Millia Islamia

Graduation: (2023).
